

Certified Supply Chain Manager (CSCM) Program

Training: July 11-15 – Exam: July 16

In just 5 days, learn all you need to pass the CPIM or CSCM Exam. Knowledge and Certification that you can put to immediate practical application right after attending the workshop.

Agenda:

Basics of Supply Chain Management Monday – July 11, 2005

In the Basics, you get a complete overview of material flow, from internal and external suppliers to and from your organization.

8:00AM – 8:30AM Registration

8:30AM – 11:30AM

Elements of the Supply Chain

Just-in-Time (JIT)

Total Quality Management (TQM)

11:30AM – 12:30PM

Lunch

1:00PM – 5:00PM

Manufacturing Resources Planning (MRP II)

Demand Planning

Capacity Management

Theory of Constraints

Operational Accounting

Lean Six Sigma

Master Planning of Resources Tuesday - July 12, 2005

The course focuses on the importance of producing achievable master schedules that are consistent with business policies, objectives, and resource constraints.

8:00AM – 8:30AM Registration

8:30AM – 11:30AM

Demand Management

Sales and Operations Planning

11:30AM – 12:30PM

Lunch

1:00PM – 5:00PM

Master Scheduling

Measuring Business Performance

Theory of Constraints

Operational Accounting

Lean Six Sigma

Detailed Scheduling and Planning Wednesday - July 13, 2005

Study detailed descriptions of material requirements planning (MRP), capacity requirements planning (CRP), inventory management practices, and procurement and supplier planning.

8:00AM – 8:30AM Registration

8:30AM – 11:30AM

Recognizing Techniques and Practices of Inventory Management

Mechanics of the Detailed Material Planning Process

11:30AM – 12:30PM

Lunch

1:00PM – 5:00PM

Planning Operations to Support the Priority Plan

Planning Procurement and External Sources of Supply

Theory of Constraints

Operational Accounting

Lean Six Sigma

Agenda:

Execution and Control of Operations Thurs - July 14, 2005

The course explains techniques for scheduling and controlling production processes, the execution of quality initiatives and continuous improvement plans, and the control and handling of inventories.

8:00AM – 8:30AM Registration

8:30AM – 11:30AM

Prioritizing and Sequencing Work

Executing Plans and Implementing Controls

Authorizing and Reporting Activities for Push and Pull Systems

11:30AM – 12:30PM

Lunch

1:00PM – 5:00PM

Evaluating Performance and Providing Feedback

Theory of Constraints

Operational Accounting

Lean Six Sigma

Strategic Management of Resources Friday - July 15, 2005

The course addresses three main topics: aligning resources with the strategic plan, configuring and integrating operating processes to support the strategic plan, and implementing change.

8:00AM – 8:30AM Registration

8:30AM – 11:30AM

Competitive Market Issues

Choices Affecting Facilities

Supply Chain, Information Technology

Organizational Design

11:30AM – 12:30PM

Lunch

1:00PM – 5:00PM

Configuring and Managing Projects

Theory of Constraints

Operational Accounting

Lean Six Sigma

Instructor: David Van Valkenburgh
CSCM, CFPIM, A.P.P., CGB, Director of ISCEA Certification Prep Programs.

David has over 20 years experience in manufacturing and procurement.

David has worked as a Design Engineer, Manufacturing Manager, and Operations Manager and is currently employed as Director of Materials for Micromeritics Instrumentation Corporation. David holds a B.S. degree in Manufacturing Engineering from New Jersey Institute of Technology. He is certified at the Fellow level CFPIM with APICS, Green Belt Six Sigma and also possesses an ISM A.P.P. certification. He has presented leading edge innovations on Supply Chain topics in seminars, training & educational workshops locally and internationally. David presently serves as National Chair for the Association Management Forum for the Institute for Supply Management and Executive VP for APICS Atlanta.

**Practical Education
that Works for You!**

The **China Supply Chain Council (CSCC)**, in partnership with the **International Supply Chain Education Alliance (ISCEA)**, will organize a 5-day certified training program on July 11-15, 2005, in Shanghai. This is the first time that the Certified Supply Chain Manager (CSCM) program is promoted in China.

ISCEA is also the developer of other recognized certification programs such as Certified Supply Chain Analyst (CSCA), Certified Lean Master (CLM), Certified Lean Six Sigma Green Belt, and Certified Lean Six Sigma Black Belt programs. ISCEA instructors are American University Professors or Managers of Major Corporations in USA with 5+ years of work experience. They all hold CPIM or CSCM Certification.

Companies who have attended ISCEA workshops:

- Automated Packaging Systems
- Avery Dennison
- Department of Defense
- Diebold Incorporated
- Eaton Corporation
- Emerson Electric
- General Motors
- Hawk Corporation
- Honeywell International
- Hyson Products
- Johnson Controls Incorporated
- L'Oreal USA
- Nestle USA
- Nordson Corporation
- Parker Hannifin Corporation
- Pepsi America
- Swagelok
- The J. M. Smucker Company
- The Nautilus Group
- The Timken Company

Certified Supply Chain Manager (CSCM) program overviews the entire Supply Chain Process.

Course begins by learning management vocabulary, followed by Elements of the Supply Chain, Product planning, Forecasting, Production Planning, Just-in-Time (JIT), Manufacturing Resources Planning (MRP II), Demand & Capacity Management, Theory of Constraints, Lean Six Sigma, Operational Accounting and ending by learning how they all fit together.

Fees:

Full 5-Days Program + Exam	RMB 7,500
5-Days Program Only	RMB 6,000
1-Day Training	RMB 1,500
Exam Only	RMB 1,000

CSCC Members can receive a special 20% discount off the above listed prices. If you want to register more than 3 persons from your company, please contact us.

Venue: The Mayfair Hotel

1555 Dingxi Road
Shanghai 200050, China

CSCM EXAM will be given on the Saturday July 16th, 2005 from am 8:00 to noon.

About the CSCM (Certified Supply Chain Manager) Exam:

ISCEA CSCM is steadily increasing in acceptance by the Supply Chain Industry as the certification that covers the Total Supply Chain Operation. In addition to standard supply chain methodology, CSCM will also cover topics such as Leadership, Lean Six Sigma, Theory of Constraints, and Operational Accounting. ISCEA CSCM certifies that the holder is both expert in Supply Chain theory and a real practitioner who can lead a modern Supply Chain Organization with P&L responsibilities.

Why ISCEA is different from APICS or ISM...

ISCEA supports both of these organizations. Most of the people who sign up to take CSCM already have a CPIM and/or CPM, which are more limited in scope. Therefore, CSCM is the next step, a more advanced certification.

Who Should Take The Exam?

ISCEA CSCM is for Supply Chain Professionals who are in mid-to-upper management positions or those who have high potential in their companies in China. In addition to knowing the Supply Chain theory to be a Production, Inventory Control, or a Purchasing Manager, CSCM test the knowledge of leading a Supply Chain Organization. That is why 20% of the exam is Operational Accounting, Theory of Constraints, and Lean Six Sigma.
